

Technical facilities: the equipment

In addition to its “conventional” equipment, the MEDES Space Clinic has a variety of scientific, medical and technical equipment for its space and clinical studies:

- * A DEXA scanner
- * An XtremeCT scanner
- * A tilt table
- * A flywheel
- * A short-arm centrifuge
- * A driving simulator
- * etc.

Furthermore, the scientific teams have access to the biomedical facilities of the Ranguel hospital (PET, SPECT, MRI, CT-scan, laboratory tests, etc.).
